

LARGE CAT DOOR INSTALLATION INSTRUCTIONS

Tools Required for Installation:

- Hammer and Awl (or Nail)
- Drill and 3/8" (1cm) Drill Bit
- Sabre Saw
- Phillips Screwdriver
- Safety Glasses

1. Placing template - Position the top of this template (supplied in box) at least 2" (5.1cm) taller than your pet's shoulder in center of door; tape in place.
Important: Under no circumstances should the bottom edge of the template cutout be positioned less than 4" (10.16cm) from the bottom edge of the door.

2. Outline pet door opening - With template taped in place, use a pencil to draw around the outside of the template onto door.

3. Cutting the opening - With template taped in place. Drill four (4) 3/8" (1cm) diameter inside corner cut-out starter holes (after marking center point with hammer and nail or awl). Remove template. Using a sabre saw, cut along inside edge pencil line. (Begin with one of the inside 3/8" (1cm) starter holes)

4. Assembly and adjustments (see diagram) - Insert outer frame (A) into opening from exterior side (frame must be flush with door surface). Place inner frame (B) into opening from inside door and hold in place. Install screws (C) and tighten until snug. **Do not over-tighten.**

Adjustable flap operation - Using the Red Adjustment Dial (D) located on door's lower inside frame (A), adjust to match desired operation as indicated on door. In only, out only, open and lock. (See picture detail at right)

Red Adjustment Dial

Important: Under no circumstances should the bottom edge of the cutout opening be less than 4" (10.16cm) from the bottom edge of the door.

As with any home improvement project, if you do not have the tools or skills to properly install your pet door, we suggest using a professional handyman or licensed contractor.
